

The Automatic mechanical cold pressed machine for diamond segment is designed for pressing and processing multi-layers diamond segments, such as sandwich diamond segments, these cold machine for diamond segment are 35ton,60ton and 50ton.

35ton cold press machine for diamond segment(BWM-KH35T)

Introduction:

This equipment is divided into two different models according to the different pressure (KH - 35T and KH 60T). On the basis of the commonly used mechanical cold press machines, We made too much improvement and adjustment. It can be used for pressing of large, medium and small saw blade segment, fan-shape segment, diameter of 14, 12, 10, 8, 6 mm drill bit segment and some special shape segment, etc.
