

Introduction:

1. Segmented diamond stubbing wheels usually used for sink hole on the wash basin, bathtub, sink and other products;
2. Stubbing wheels also can use for calibrating the stone slab, these wheels have large segments for fast stock removal;
3. The diameter of the stubbing wheels is 100mm, segment height is 20mm, connection is 50mm, diamond segment type is segmented, the wheels usually used on CNC machines;
4. We offer a variety of different grits, types, and sizes of stubbing wheels, the stubbing wheels can process many kinds materials.

Features:

1. With feature of high efficiency, accuracy in shape and size;
2. Stubbing wheels can process variety materials, wide applicability;
3. Other specifications can be customized after communication.

Specification:

Diameter	Segment Height	Inner Hole	Connection	Grit	Machine
50	20	10 50	Φ10-2 + 2Hole	30/40#	CNC machine
86	25		Φ50-3 + 3Hole	60#	
90	30		Φ50-3 + 3Hole	100#	
100	40		Φ50-3 + 3Hole	120#	

Other connection and specification can be customized according to need.
