

Introduction:

The deburring machine is used for removing burr of diamond segments after sintering, it can also be used for removing burr of some other solid block materials.

Features:

- 1.Simple structure, low failure rate.
- 2.The machine itself is not very noisy,.
- 3.Low power consumption.

Specifications:

The followings are the normal specifications of our deburring machine for diamond segments:

Parameters	Numerical
Type	BW-DM01
Power supply voltage	220V / 380V
Motor Power	750 W
Speed	29 r/min
Equipment dimensions	950mm*450mm*750mm
Volume / truck	25 Kg
Weight	60 Kg

The above specifications are for reference, other or special specifications can be ordered by customers.
