

Product Description:

Brief Introduction:

Diamond gang saw blades are one of the most widely and most advanced tools used in cutting stone blocks. The diamond gang saw blades have the characteristics of high processing efficiency, high yield, high cutting accuracy, good surface evenness, high flexibility of plate size, saving water and electricity.

Features:

1. Using ultra high quality diamond powder, after coating titanium, reduce the heat damage.
 2. High quality blank ensures smooth and efficient cutting.
 3. Ultra vacuum hot pressing sintering technology to ensure the consistency and stability of products.
 4. The sandwich structure is more stable in cutting and ensures the thickness, consistency and integrity of the plates.
- All of our products have been strictly tested before access to market.

Specification:

Specification of diamond gang saw blade:

Steel Blank	Overall length (mm)	3950
		4100
		4400
		4600
	Blade height (mm)	180
		1.5
		1.75
		2.0
	Blade thickness (mm)	2.5
		20-50
		2.4/2.2
		2.8/2.4
Segment dimension	Length (mm)	3.5/2.9
		4.2/3.6

Reference data:

Cutting material	Cutting area	Cutting speed
Beige stone series	4000 m ²	14-20 cm/h
Emperador stone series	20000 m ²	12-18 cm/h
Serpenggiante series	45000 m ²	16-18 cm/h
Sandstone series	8000 m ²	45-80 cm/h
Artificial stone series	100000 m ²	25-35 cm/h

Other specification can be customized according to need.

Packing & Delivery:

- 1.Tools packing in carton cases;
- 2.Large machines packing in wooden cases;
- 3.When tools are in large quantities, they are packing in wooden cases.
