

Product Description:

Brief Introduction:

The saw blade welding machine is used for welding diamond circular saw blade, is a new type of diamond saw blade welding auxiliary equipment. This machine has gripper, pneumatic sliding table and other high-precision components, thus greatly improving the welding accuracy and efficiency, to protect the segments and the base of the welding strength. Compared with similar welding machine with a high level of automation, positioning accuracy, stability, and long service life. This series of products using user-friendly design, general workers can operate on the machine. In addition, the welding machine compact structure, most of the wearing parts can be purchased in stores around without having to rely on vendors after-sales.

Features:

- 1* Welding diameter range can be adjusted ;
- 2* Welding frame structure is compact and reliable ;
- 3* High level of automation, good stability, long service life ;
- 4* To ensure the welding diamond segments and the matrix strength ;
- 5* Automatic high-frequency heating, cooling quickly, the segment clamp tightly ;
- 6* Most of the wearing parts are available in all parts of the hardware store to buy your own replacement, convenient and quick.

All of our products have been strictly tested before access to market.
