

Introduction:

Normal segmented diamond core drill bits are suitable for electrical hand-held drillers or CNC machines for drilling small holes on kinds of stone such granite, marble, sandstone, limestone, slate, etc. Common uses would be small projects such as drilling out sink holes for faucets.

Features:

- 1.Applicable for most hand-held drillers or CNC machines.
- 2.silver welded is better for wet use and laser welded is better for dry use.
- 3.Good balance and stable performance.
- 4.High efficiency and longer lifespan.

Specifications:

The followings are the normal specifications of our normal segmented diamond core drill bit:
