

Product Description:

Brief Introduction:

The diamond saw blade welding strength testing machine for testing the welding strength between diamond segment and saw blank automatically

Features:

- 1* The segments can be located automatically and the quantity of segments can be set as wish;
- 2* The tester can be used to test saw blades of all kinds of slot;
- 3* The welding strength standard can be set between 4-60 N/m;
- 4* The machine will record the number of segments tested and stop working when it reaches the preset number;
- 5* Small volume, easy to operate, saving energy and good looking.

All of our products have been strictly tested before access to market.

Other specifications can be customized according to requirements.

Details:

Specification of diamond saw blade welding strength testing machine:

Model	BWM-HJJC01
Voltage	AC 220 V
Power	1 KW
Control and OS	Touch screen and PLC
Application range	200-600 mm
Size	900*500*1300 mm
Segment type	All types
Moment	4-60 N/m
Air source pressure	0.8 Mpa
Air source flow	30 L/min
Air source connector size	8 mm
Weight	170 KG

Other specification can be customized according to need.
