

Introduction:

Diamond vacuum brazed saw blades are widely used for wet or dry cutting various kinds of stone, concrete, brick, pvc, metal, fiberglass and other building materials. These saw blades can perform very well both used as normal saw blades and rescue blades.

Features:

1. Vacuum brazed, super aggressive and very smoothly while cutting crisp materials.
2. With vacuum brazed diamond powder inside, the blade cuts fast on almost any building materials.
3. The cutting gap can be very thin.
4. Environmental friendly.

Specifications:

The followings are the normal specifications of our diamond vacuum brazed saw blades:

Product Name	Diameter (mm)	Steel Core (mm)	Segment Height (mm)	Grit	Inner Hole
Diamond Vacuum Brazed Saw Blade	Ø100	1.2	3~5	30#~60#	22.23mm
	Ø105	1.2	3~5	30#~60#	25.4mm
	Ø115	1.2	3~5	30#~60#	50mm
	Ø125	1.2	3~5	30#~60#	60mm
	Ø150	1.4	3~5	30#~60#	
	Ø180	1.6	3~5	30#~60#	
	Ø200	1.8	3~5	30#~60#	
	Ø230	1.8	3~5	30#~60#	
	Ø250	2.0	3~5	30#~60#	
	Ø300	2.0	3~5	30#~60#	
	Ø350	2.2	3~5	30#~60#	
	Ø400	2.6	3~5	30#~60#	

The above specifications are for reference, other specifications can be ordered by customers.
