

## Introduction:

**Diamond zero tolerance grinding wheel** is used for stock removal, cleaning up bowls and preparing the edge of stone, is the fastest way to removal material after cutting out sink holes with diamond blades or shape a radius on the outside edge. Segmented and resin-filled are both available upon clients' demands, resin filled ones supplies smoother and stable performance, with long lifespan.

## Features:

1. High efficiency, long lifespan and fast milling speed.
2. Perfect balance with zero vibration and stable performance.
3. Smoother milling without stone edge damage.

## Specifications:

The followings are the normal specifications of our **diamond zero tolerance grinding wheels**:

Product Name	Type	Diameter	Segment Length	Connection
Diamond Tolerance Grinding Wheel	Segmented	50mm 75mm	20mm 25mm	5/8"-11 1/2" Gas
	Resin Filled	100mm	30mm 35mm 40mm 50mm	

The above specifications are for reference, other specifications can be ordered by customers.

Quality: Premium.
