

Descriptions:

Double layer vacuum brazing bush hammer plate is Widely used on granite, marble sandstone to make rough surface.

Connecting: M14
Diameter: D125mm
Number of Roller: 3T

This Type of double layer **vacuum brazing bush hammer plate** is used sophisticated welding technology and selecting high quality aluminum alloy to casting, bush hammered's grit can be changed through the adjustment of spring elasticity on bush hammer, manual grinding machine press.

Both enlarging spring's interval to reduce spring elasticity and reducing machine's press can enhance bush hammer vibration to make bush hammered face rough.

It is suitable for surface machining and grinding the rough effect on the surface. We can sell the Bush hammer roller separately, and the grinding roller can also be customized as required

Feature:

1. Great for removing any flexible coatings or most epoxies.
2. Create a very rough and anti-slip surface,rollers can be ordered separately for replacement.
3. Profile a surface to provide a good bonding surface,good for removal of thin coatings on floors.
4. Vacuum double layer bush hammer plate is for making coarse sandblasting surface. Bush hammers produce a bush-hammered profile on floor.
5. Both enlarging spring's interval to reduce spring elasticity and reducing machine's press can enhance bush hammer vibration to make bush hammered face rough.
