Double Rectangle Segments Lavina Diamond Tools For Concrete Grinding

Diamond concrete grinding shoes are the best solution for large areas of thin coating removal, leveling and smoothing high spots in concrete, and working very well for cleaning concrete. Their segments are designed for aggressive grinding of concrete to make less work of your larger projects. These high quality Diamond Grinding Shoes are also ideal for the initial stages in concrete polishing processes.

These fast-changing diamond grinding shoes are healthy for the lavina floor grinder, helping

better diamond operators to spend less time on site, cutting faster, being more aggressive and saving their budget.

Specifications:

Following are the general specifications Double Rectangle Segments Lavina Diamond Tools For Concrete Grinding:

Name:	Double Rectangle Segments Lavina Diamond Tools For Concrete Grinding
Block grit:	16 # 30 # 50 # 120 # and so on
Shape:	Lavina
Block shape shape	Double Rectangle Segments
material:	Diamond + metal powder
Quality:	International standard quality
Bond:	Soft, medium hard, hard
Benefit:	High grinding efficiency

Specifically designed tools are available for any standard application. We can do it Tailor your equipment to your specific needs.

Tips: Diamond Bond Choice

Soft Bond - For hard concrete, between 4000 and 5500 psi. The bond must be softened to expose the diamond crystals to grind the hard surface. Hardened concrete consists of hardened granite, quartz, river stone, flint.

Medium bonds - for medium concrete, between 2500 and 4000 psi - are the suggested, most popular and most common bonds used in most cases. For use on common pit gravel and / or medium river stones, traprock, crushed gravel floors. Soft and hard bonds are usually reserved for extreme (unusual) cases.

Hard Bond - For soft concrete, typically below 2500 psi. Bonds have rigid metals in their matrix that withstand friction, so diamond crystals are not kicked-out before the surface has a chance to work. Soft concrete consists of limestone, sandstone, dolomite, soft shell.

We also offer super soft bonds at 5500 psi for additional hard concrete. And super hard bonds for extra soft concrete.

Application:

Double Rectangle Segments Lavina Diamond Tools For Concrete Grinding

Design for leveling adhesives, thin coating and uneven spots or joints.

Grinding shoes are designed for grinding and polishing concrete floors. Boots / Cakes come with soft bond, rigid bond and standard medium bond and mixed grits. These concrete diamond grinding shoes fit into the fast change style piece and polishing heads. Grinding shoes are designed for extended life compared to the competition with a jumbo-size segment and a lower grinding cost per square yard.

Concrete Grinding Effect

Benefit:

- 1) A combination of superior diamonds and a highly durable and unique matrix
- 2) Removes stock quickly and efficiently to reduce its product and labor costs
- 3) Lasts longer than competing products and won't shine
- 4) Surprising results on most types of concrete from soft to very hard

Features:

Patience: 6 #, 16 #, 20 #, 30 #, 60 #, 80 #, 150 #, 220 #, 280 #, 300 #, 400 #

Used for concrete and terrazzo flooring

Reducing scratches. Round sections are less aggressive and leave more subtle scratch patterns

TIPS:

Choose between one or two segments (buttons or bars) to control the speed and aggressiveness of the cut.

Double button / bar tools are designed for heavier machines, and are not recommended for machines smaller than 25 inches.

Single button / bar tools are designed for lighter machines, or where aggressive stock removal is required.

We recommend using single-segment tools for the first step even with heavier machines for faster opening of the concrete.
