

Introduction:

Resin dry use diamond grinding and polishing pad can be a variety of special-shaped stone polishing corners, inner arc, grinding sharp, in the absence of water situation and efficient completion of the stone grinding and polishing process, compared to ordinary water mill sheet, can prevent stone produce water spots , macular, anti-alkali.Various surface processing, using sequential 2 for stone: from rough to fine grinding, final polishing. You can also 3-step, five-step easy to use.

3. Main size: 50 #, 100 #, 200 #, 400 #, 800 #, 1500 #, 3000 #.

Features:

1. Easy to use, fast, fast polishing.
2. stable quality, high-speed grinding, high efficiency. Heat resistance (400 °C high temperature) and high pressure resistance, long service life.
3. With a sharp grinding, polishing fast, luminosity brightness advantages.
4. With a standardized color granularity and good flexibility.

specification:

Here is our Resin dry use diamond grinding and polishing pad General Specifications:

diameter	granularity	Types of
80mm (3")	50 #, 100 #, 200 #, 400	Wet polishing
100mm (4")	#,	
125mm (5")	800 #, 1500 #, 3000 #,	
150mm (6")	BUFF	

Other specifications can be customized according to requirements.
