

Product description:

Brief introduction:

L155 resin fickert grinding block for ceramic is installed in the front of the polishing machine, mainly used for polishing ceramic tile surface, with high efficiency, strong grinding, not easy to damage the edge, long life, low energy consumption and no pollution, usually used after metal fickert grinding blocks.

Features:

- 1, The unique design with good sharpness allows easy dust removal, low noise and safety.
- 2, This product provides high accuracy and smooth surface in ceramic processing.
- 3, High efficiency accuracy in shape and size.
- 5, Other specification are available upon client's request.

Advantage:

Our products export to Brazil, India, Australia, USA, Ukraine, Italy, Poland, Russia , more than 20 different countries . In these overseas markets, our products enjoy a good reputation, we get good feedbacks after their corresponding test result, so, we are confident in our products quality.

All of our products have been strictly tested before access to market.

Other specifications can be customized according to requirements.

Details:

Specification of L155 resin fickert grinding blocks for ceramic:

Connection: Slot

Materials: Resin

Length: 155 mm

Applicable materials: ceramic

Adaptation machine: Continuous grinding machine

Production methods: Pressed

Place of origin: China

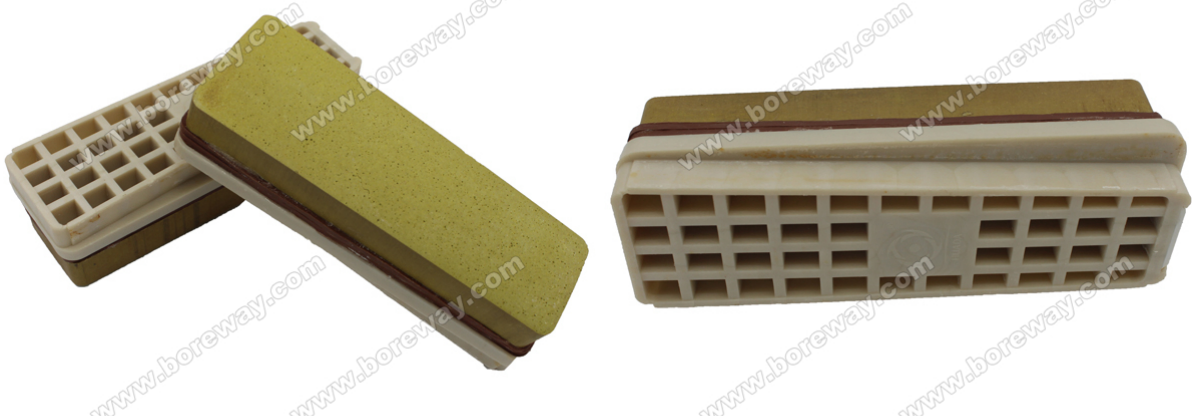

The following shows only part of the product, other products can be customized according to your needs
