1. Can be designed into a variety of different shapes of single segment or double segments, also can be customized according to the customer's special shape and specific numbers of segments.
2. For example below can be made into a three inch and ten segments grinding disc , providing an ultra-long service life , this model is recommended for large horsepower or large

grinding machine.

Bond:

1. Soft Bond - The metallic powder in the sintered segment wears away quickly releasing dull diamond crystals exposing new abrasive crystals to cut efficiently. Best used on hard surfaces.
2. Medium Bond - A metal bond strength right between that of soft and hard bonds.
3. Hard Bond - The bond of the metallic powder in the segment wears away slowly and prevents premature wear against soft, abrasive surfaces.
