

Introduction:

PCD diamond grinding plate/blocks are used on floor grinding machines to remove the thick epoxy, glue,

paint and other uneven coating of concrete, terrazzo and stone floor, showing a flat and brand new floor.

The PCD segments make the grinding in very high efficiency.

Features:

1. High aggressive and efficient for various concrete floors.
2. Stable performance and long lifespan.
3. Different hardness for different concrete are available upon clients'.

Specifications:

The followings are the normal specifications of our PCD diamond grinding plates/blocks:

Product Name	Segment Material	Segment No.	Grit	Applications
PCD Grinding Plate/Block	Diamond Segment PCD segment	2-3	#6, #16, #25, #30, #40, #50, #60, #80, #100, #120, #150, #170, #200	Concrete Terrazzo Stone Floor

The above specifications are for reference, other specifications can be ordered by customers.
