

**Introduction:**

Resin bond abrasive disc is designed for fine grinding on granite slabs, usually applicable for automatic grinding machines or hand operated machines.

**Features:**

1. High processing efficiency and long lifespan.
2. Good balance and stable performance.
3. Good abrasive effect.

**Specifications:**

The followings are the normal specifications of our resin bond abrasive disc:

| Product Name                | Diameter  | Grit     | Segment W*H | Segment Number |
|-----------------------------|-----------|----------|-------------|----------------|
| Resin Bond<br>Abrasive Disc | 6'' 150mm | 500#     | 20*20mm     | 12             |
|                             | 8'' 200mm | 800#     | 20*20 mm    | 12             |
|                             |           | 1500#    |             |                |
| 10'' 250mm                  | 3000#     | 20*20 mm | 12          |                |

The above specifications are for reference, other specifications can be ordered by customers.
