

Introduction:

Sandwich whole

sintered diamond fickerts are widely used for grinding slabs of granite,marble,quartz and ceramic from coarse to fine. These fickerts are used on automatic continuous polishing machines with high efficiency and long lifespan,cost lower than magnesia grinding blocks.

Features:

- 1.Sandwich whole-sintered construction offers smooth polishing and longer lifespan.
- 2.Its sharpness can reduce the pressure of grinding head,therefor reduce machines abrasion.
- 3.Its super sharpness can improve transmission speed of convey belt and improve the production efficiency.
- 4.It can bring 10 degree more in stone high glossiness,without scratch or break slates while grinding.

Specifications:

The followings are the normal specifications of our sandwich whole-sintered diamond fickert:

Product Name	Model	Specifications	Normal Grit	Applications
Sandwich Whole-Sintered Diamond Fickert	T130	130*56*15(20)	36# 46# 60# 80#	Granite Marble Quartz Ceramic
	T140	140*56*15(20)	100# 120# 140#	
	T170	170*56*15(20)	180# 240# 320#	

The above specifications are for reference, other specifications can be ordered by customers.

Quality: Good quality,Premium.
