

Introduction:

Segmented turbo diamond cup grinding wheels are used on angle grinders and floor grinding machines

for grinding concrete and stone. The aslant welded sintered segments offer a higher grinding efficiency

and better grinding performance.

Features:

1. High efficiency and longer lifespan.
2. Good balance and stable performance.
3. Segmented turbo design offers better grinding performance.

Specifications:

The followings are the normal specifications of our segmented turbo diamond cup grinding wheels:

Product Name	Diameter	Connection	Segment Height	Grit
Segmented Turbo Diamond Cup Grinding Wheel	5'' 125mm	5/8''-11	7-10 mm	Rough(6# 16# 30#) Medium(60#) Smooth(120#)
	6'' 150mm	20mm	7-10 mm	
	7'' 180mm	22.23mm	7-10 mm	
	9'' 230mm	M14 Snail Lock	7-10 mm	

The above specifications are for reference, other specifications can be ordered by customers.

Quality: Good quality,Premium.
