

Introduction:

The “BWM-HJ08” welding frame can weld diamond saw blade from ø240mm to ø900mm (Max ø1400mm can be welded after being boosted 500mm high). Compared with similar welding machine with a high level of automation, positioning accuracy, stability, and long service life. This series of products using user-friendly design, general workers can operate on the machine.

Feature:

1. Welding diameter range: 240 ~ 900 mm.
2. Cylinder clamping saw blade base to ensure welding accuracy.
3. Small size, light weight, simple operation, general training can be operated simply.

Specification:

Specification of Semi auto welding frame for diamond saw blades of max size 1400mm:

Model No: BWM-HJ08	
Welding Range	Φ240mm - 900mm(Max 1400mm)
Verticality	≤± 0.3mm
Parallelism	≤± 0.3mm
Welding Rate	4-20 PCS/Min
Air Pressure	0.3 - 0.6Mpa
Water Pressure	≥ 0.2Mpa
Voltage	220V (Single-phase)50Hz
Power(From LED Light)	1.0W
Water Consumption	1.5 - 2m³/h
Machine Dimensions	L940*W440*H1440mm
Equipment Weight	85Kg
Package Dimensions	L1600*W520*H550(Horizontally)
Package Weight(Wooden Package)	115Kg

Note :This machine doesn't include high frequency Welding machine , air compressor and water pump.
