

Introduction:

Short-

T edge cutting blade with unique T design segment side face allows ideal debris removal and better cooling,

improves the sharpness and cutting efficiency. Besides, this design reduces blade stone interface while cutting that

will minimize cutting friction and noise. Compared to the long segment (L40), this short segment (L20) design makes

better cutting efficiency.

Features:

1. Higher cutting efficiency than general segment blade.
2. The special design will not allow easy edge collapse, break, tapered slab etc.

Specifications:

The followings are the normal specifications of our short-T edge cutting blade and segment:

Product Name	Diameter (mm)	Steel Core (mm)	Segment Dimension (mm)	Segment Number	Application
Edge Cutting Blade For Granite	Ø300	2.2	20*3.4/3.0*20	40	Granite
	Ø350	2.2	20*3.4/3.0*20	46	
	Ø400	2.6	20*3.4/3.0*20	52	
	Ø450	3.0	20*3.4/3.0*20	58	
Splitting Blade For Granite	Ø500	3.0	20*4.2/3.8*15(20)	66	
	Ø550	3.6	20*5.0/4.4*15(20)	72	
	Ø600	3.6	20*5.0/4.4*15(20)	80	
	Ø650	4.0	20*5.4/4.8*15(20)	84	
	Ø700	4.0	20*5.4/4.8*15(20)	90	
	Ø750	4.0	20*5.4/4.8*15(20)	94	
	Ø800	4.5	20*6.0/5.4*15(20)	100	
	Ø850	4.5	20*6.0/5.4*15(20)	106	

The above specifications are for reference, other specifications can be ordered by customers.
