

Diamond cutter head sintering machine with a cast iron mold box

Plot:

This series of diamond cutter head sintering machine with a cast iron mold frame suitable for diamond segment diamond segments and other pressing shaping sintering. Specifications and diverse, High precision, deformation, durable.

Features:

1. Using high-quality cast iron, precision manufacturing, ensure the accuracy and longevity.
2. In response to the specific requirements of customers customized specifications shape and diverse, flexible and efficient delivery.

Specifications:

Specifications and dimensions specified by the customer.

The price depends on the specific mold frame size, quality, depending on the price of the note for reference.
