

Introduction:

Spiral resin segment diamond cup wheels are designed with a large diamond grit for fast production. Wide gaps between segments help prevent loading or gumming up. Using a hard bonded diamond for soft concrete to extend life.

Features:

1. Good balance and stable.
2. High efficiency and long lifespan.

Specifications:

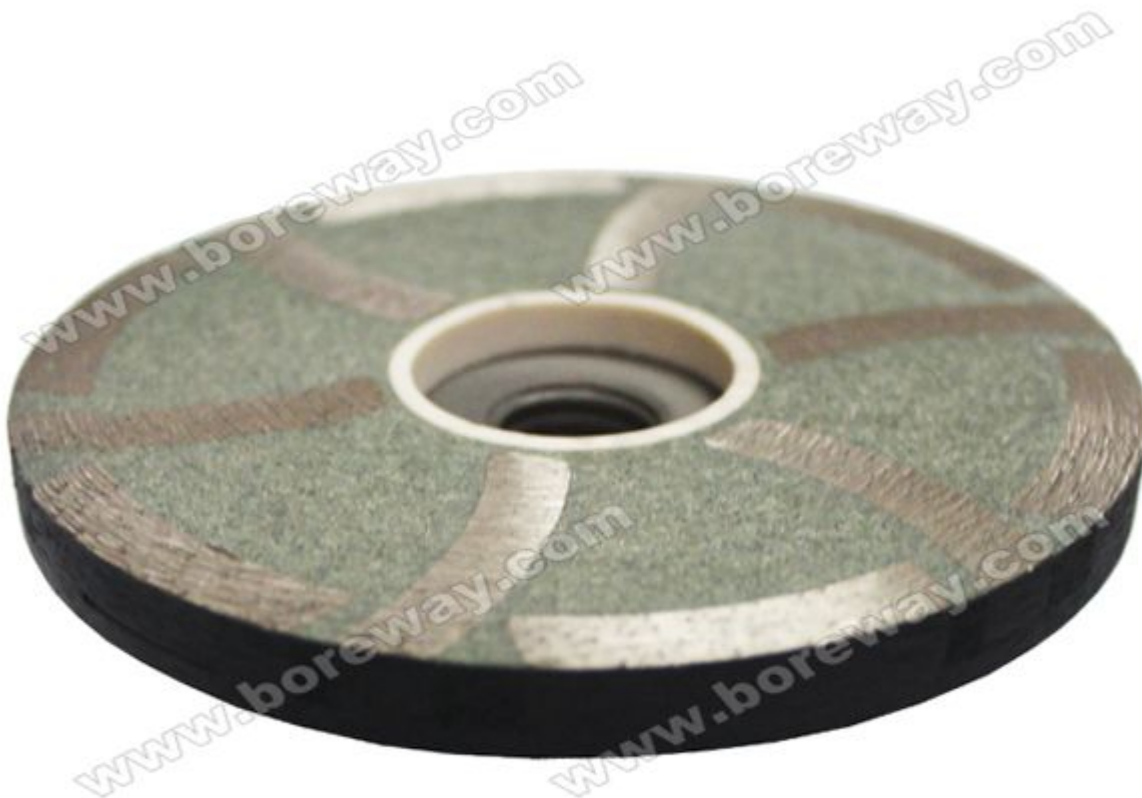

Spiral Resin Segment Diamond Cup Wheel

Diameter	Segment Height	Connection	Body	Grit
100mm(4inch)	5-10mm	5/8"-11 ø20mm ø22.23mm M14 M16 M18 Snail Lock	Steel Alumunium	Rough (#30) Medium (#60) Smooth (#120)
110mm(4.3inch)				
125mm(5inch)				
150mm(6inch)				
180mm(7inch)				
200mm(8inch)
