

Introduction:

45s Diamond Bush Hammered Roller is used on manual grinding machines or auto/semi-auto bush hammered machines to process bush hammered litchi surface on concrete granite, marble and other stone surface.

The processing surface can be very uniform and seems real and natural.

The rollers can be changed conveniently, greatly reduced the production costs.

Features:

1. For granite has high grinding efficiency and long lifespan.
2. Uniform, real and natural processing surface.
3. Much lower production costs compared with traditional processing method.
