

Introduction:

This diamond saw blade is wet use for cutting marble, granite, sandstone and other stone, used for cutting curved panels.

Features:

1. Universal wet cutting blade.
2. Unique design of segments allows ideal debris removal, better cooling and protecting steel core, and provide extremely fast cutting.
3. Turbo teeth offer fast and smooth cutting, high performance/price ratio.
4. T-shaped can protect metal matrix.

Specifications:

The followings are the normal specifications of our T-shaped concave turbo wave diamond saw blade:

Diameter	Inner hole	Segment height
105mm(4")	20mm 22.23mm (7/8")	8mm
125mm(5")		
150mm(6")		
180mm(7")		
200mm(8")		
230mm(9")		

The above specifications are for reference, other specifications can be ordered by customers.
