

Introduction:

Trapezoid diamond concrete floor grinding block is used by floor grinding machines to remove the epoxy, glue, paint and other uneven

coating of concrete, terrazzo and stone floor. The external plugging design makes the installation easy and convenient.

Features:

1. High aggressive and efficient for various concrete floors.
2. Stable performance and long lifespan.

Specifications:

The following are the normal specifications of trapezoid diamond concrete floor grinding block:

Product Name	Segment Material	Segment Shape	Segment No.	Normal Grit	Applications
Trapezoid Diamond Concrete Floor Grinding Block	Diamond	Cuboid	2	#6, #16, #25, #30, #40, #50, #60, #80, #100, #120, #150, #170, #200	Concrete Terrazzo Stone Floor

The above specifications are for reference, other specifications can be ordered by customers.
