

Introduction:

Trapezoid Diamond Two PCD Grinding Shoe For Floor Coating Removal

Trapezoid Diamond Two PCD Grinding Shoe For Floor Coating Removal is a company specializing in the production of diamond tools with many years experience. We provides full line of abrasive tools for concrete and stone grinding and polishing. Application for all kinds of concrete,terrazzo and stone floor preparation on floor or old floor renovation before pollishing. We can also make diamond polishing pads for concrete polishing.

Trapezoid Diamond Two PCD Grinding Shoe For Floor Coating Removal is a very aggressive and popular floor coating removal tools. The 1 bar and 2 quarter round PCD segments provide a high working efficiency and a long lifespan. For best results, use to remove the bulk of thick coatings without continued contact with concrete. Come back with an aggressive metal bond diamond segment and clean up any thin coating left behind. This helps to preserve the life of the PCD segments.

Trapezoid Diamond Two PCD Grinding Shoe For Floor Coating Removal. The advantages of the PCD products are that they will not load up or smear the coating like a traditional diamond floor grinding tools. The PCD segment scrapes and rips the coating from the surface. This trapezoid metal bond M6 screw PCD diamond grinding shoe is designed for contractors looking to control costs but still wants a highly productive product.

Trapezoid Diamond Two PCD Grinding Shoe For Floor Coating Removal. No matter what kind of floor surface are going to be grinded, Boreway always have proper diamond grinding tools for you with competitive price. For more information of our trapezoid metal bond M6 screw PCD diamond grinding shoe, please contact Boreway or our distributors today.
