

Introduction:

Triangle segments for construction diamond core drill bits are suitable for drilling cured reinforced concrete, green concrete or stone material. Under same bond conditions, the drilling speed of this turbo segments is much faster than normal flat segments.

Features:

1. Triangle segment provide higher drilling efficiency.
2. Wet or dry drilling.
3. Long lifespan and stable performance.

Specifications:

Segment Size: 25*20*20*4.0/5.1mm

The specifications of the triangle segment for construction diamond core drill bits can be ordered by customers.

Quality: Normal, Good quality, Premium.
