

## Introduction:

**Vacuum Brazed Router Bits for Granite, Marble, Engineered Stone, Quartz, Travertine, Limestone, and Other Natural Stone.**

**1/2" shank vacuum brazed router bits for use in porter cable and other handheld routers.**

**Vacuum Brazed Diamond Router Bits come in: zero tolerance wheels, A radius, B demi bullnose, E bevel, F ogee, V full bullnose. Boreway offers various kinds of router bits, some with or without bearings.**

**Vacuum Brazed Diamond Router Bits Applying the latest technology, we offer vacuum brazed diamond router bits that provide most aggressive performance and highest efficiency. Brazed diamond router bits can increase your productivity by as much as 100% as compared to those of metal bond router bits. The vacuum brazed diamond router bits will keep their true shapes during their entire lives. If used properly and are taken good care of, the bits will last as long as some best quality metal bond bits. Their prices are much more affordable than those of metal bond bits.**

**Operation speed: 8000 - 9000 RPM**

**Apply to: Portable stone routers such as Hercules, Master, Ghines Sector, Stinger, Dia-Pro X-Treme, Diarex Magnum etc.**

**Operation Condition: With Water.**

## Feature:

- 1. Bottom stop bearing keeps the bit from cutting into the stone;**
- 2. Use wet or dry. Water or other cooling agent is recommended for longer life of the bit;**
- 3. New vacuumer brazed technic provide much better performance Fast cutting & long life.**

## Specification:

**Vacuum Brazed Diamond Router Bits for Granite Marble Router Cutter with 1/2" Shank**

Brand	Boreway
Main material	artificial diamond
Size	12.7MM Shank
Grit	#60
Styles	More than 23 different models for selection
Quantity available	100000pcs
Shipping time	30-40days for 100000Pcs
