

Introduction:

Our brazing diamond finger bits are designed for granite & marble slabs trimming, drilling and milling.

Mainly used on CNC machines or other hand-held grinding machines. The unique design of our diamond bit allows better cooling and easy dust removal, good sharpness and long life.

Features:

- 1.Special diamond brazing technology, diamond particles attached to the substrate firmly.
- 2.High efficiency and long lifespan.
- 3.Environmental protection, no pollution.
- 4.A wide range of applicability.

Specifications:

The followings are the normal specifications of our vacuum brazed finger bit:

Application	Diameter	Segment Length(mm)	Thread
Granite Marble Quartz	20mm(3/4")	30	Gas 1/2"
	25mm(1")		
	30mm(1-1/4")	35	
	35mm(1-3/8")	40	
	40mm(1-5/8")		
	50mm(2")	45	
	60mm(2-3/8")	50	
	75mm(3")		

The above specifications are for reference, other specifications can be ordered by customers.

Quality:Premium.
