

Product Description

The reliable quality bush hammer tool is suitable for surface processing to create set hammer effects for stone products. It is rollable and very efficient, for example, a roller with a diameter of 200 mm can produce more than 100 square meters of stone products per day. We can sell rollers individually, in many styles and sizes, or customize them.

Our **high performance bush hammer roller with support** adopts advanced welding technology and is widely used for granite, marble and sandstone to make its surface rough.

Feature:

1. Chinese factory bush hammer roller creates a non-slip surface on concrete and paving stones
2. Easily and quickly removes traffic lanes from asphalt and concrete and other surfaces without causing excessive damage to the surface
3. make coatings on concrete and asphalt easy to remove
4. texturing or profiling the surface to speed up the initial cut of bare polished concrete floors
5. Easy to replace

Product Specification:

The specification of **high performance bush hammer roller with support**:

Shape	Segment Number	Material	Segment Process
Pyramid	60S	Tungsten Carbide	Soldering

The normal specification of rotary bush hammer roller:

Model	Out Diameter	Wheel Width	Segment Quantity	Segment Diameter	Remark
